#Creamos un entorno virtual en nuestra carpeta de ejercicios Python

```
C:\Users\Lenovo>cd Documents/Pythonenv
C:\Users\Lenovo\Documents\Pythonenv>python -m venv virpy
C:\Users\Lenovo\Documents\Pythonenv>python --version
Python 3.9.6
```

#Activamos nuestro ambiente virtual creado anteriormente

```
C:\Users\Lenovo>cd Documents\pythonenv\virpy
C:\Users\Lenovo\Documents\Pythonenv\virpy>Scripts\activate
(virpy) C:\Users\Lenovo\Documents\Pythonenv\virpy>python --version
Python 3.9.6
(virpy) C:\Users\Lenovo\Documents\Pythonenv\virpy>Scripts\deactivate
C:\Users\Lenovo\Documents\Pythonenv\virpy>
```

#Por medio del comando freeze verificamos las bibliotecas que tenemos instaladas en nuestro #ambiente virtual

```
(virpy) C:\Users\Lenovo\Documents\Pythonenv>pip install python-dateutil
Requirement already satisfied: python-dateutil in c:\users\lenovo\documents\pythonenv\virpy\lib\site-packages (2.8.2)
Requirement already satisfied: six>=1.5 in c:\users\lenovo\documents\pythonenv\virpy\lib\site-packages (from python-date util) (1.16.0)

(virpy) C:\Users\Lenovo\Documents\Pythonenv>pip freeze
python-dateutil==2.8.2
six==1.16.0
style==1.1.0
update==0.0.1
```

#Desactivamos nuestro ambiente virtual

(virpy) C:\Users\Lenovo\Documents\Pythonenv>virpy\Scripts\deactivate
C:\Users\Lenovo\Documents\Pythonenv>
